### SCOPE OF THE CONFERENCE

The conference focuses on presentation of control methods and algorithms, new control systems, information and communication technologies (ICT) and their industrial applications. Its main aim is to provide a general forum for researchers, teachers and users from practice dealing with practical problems of control and ICT. Conference papers may range from highly theoretical works to industrial and engineering applications. Technical program will include invited talks of leading personalities in control engineering and applied informatics.

#### **INSTRUCTIONS FOR AUTHORS**

The conference language is English. All submitted papers will be peer-reviewed based on the full versions of manuscripts. Draft paper in PDF format prepared according to the IEEE Manuscript Template are to be submitted via submission portal by December 4,
